Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I need an early warning before floods occur." • "Weather forecasts are difficult to understand." • "I want accurate and reliable flood alerts."	THINKS • "Will heavy rainfall cause flooding in my area?" • "Can I trust this prediction system?" • "How can I prepare before the flood arrives?"
PERSONA NAME (Role / User Type)	
DOES • Monitors weather updates during the rainy season. • Checks rainfall levels and local news. • Moves valuables and livestock to safer places when alerts are issued.	FEELS • Worried about heavy rainfall and floods. • Anxious about crop damage and financial losses. • Concerned for the safety of family members.
