

Project Initialization and Planning Phase

Date	7 June 2026
Team ID	XXXXXXXXXX
Project Title	Rising Water
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	Develop an AI system to predict floods accurately.
Scope	• Predict flood risk • Display results • Web-based application
Problem Statement	
Description	Floods cause loss of life and property due to delayed warnings.
Impact	• Better safety • Reduced damage • Faster decisions
Proposed Solution	
Approach	Use Machine Learning on historical flood data to predict flood risk.
Key Features	Flood prediction, Fast results User-friendly interface

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	T4 GPU
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	1 TB SSD
Software		
Frameworks	Python frameworks	Flask
Libraries	Additional libraries	scikit-learn, pandas, numpy, matplotlib, seaborn
Development Environment	IDE	Jupyter Notebook, pycharm
Data		
Data	Source, size, format	Kaggle dataset, 614, csv UCI dataset, 690, csv
